

CREATE THE IBM WATSON IOT PLATFORM AND A DEVICE

Date	13 November 2022
Team ID	PNT2022TMID38668
Project Title	Gas Leakage Monitoring Alerting System For Industries

Create a IBM Watson IOT platform and a device in the IBM cloud:

The screenshot shows the IBM Watson IoT Platform dashboard. The main heading is "Browse Devices". Below the heading are two buttons: "All Devices" and "Diagnose". A text block states: "This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API." Below this is a search bar labeled "Search by Device ID". To the right of the search bar is a "Device Simulator" toggle switch. Below the search bar is a table with the following columns: Device ID, Status, Device Type, Class ID, and Date Added. The table contains one row with the following data: Device ID 1902, Status Disconnected, Device Type android, Class ID Device, and Date Added Nov 9, 2022 11:54 AM. At the bottom of the table, there is a pagination bar showing "Items per page 50" and "1 of 1 page".

Device ID	Status	Device Type	Class ID	Date Added
1902	Disconnected	android	Device	Nov 9, 2022 11:54 AM
